#### **750/15.6. Private business switch service 9-1-1 service**

§ 15.6. (a) After June 30, 2000, or within 18 months after enhanced 9-1-1 service becomes available, any entity that installs or operates a private business switch service and provides telecommunications facilities or services to businesses shall assure that the system is connected to the public switched network in a manner that calls to 9-1-1 result in automatic number and location identification. For buildings having their own street address and containing workspace of 40,000 square feet or less, location identification shall include the building's street address. For buildings having their own street address and containing workspace of more than 40,000 square feet, location identification shall include the building's street address and one distinct location identification per 40,000 square feet of workspace. Separate buildings containing workspace of 40,000 square feet or less having a common public street address shall have a distinct location identification for each building in addition to the street address.

(b) Exemptions. Buildings containing workspace of more than 40,000 square feet are exempt from the multiple location identification requirements of subsection (a) if the building maintains, at all times, alternative and adequate means of signaling and responding to emergencies. Those means shall include, but not be limited to, a telephone system that provides the physical location of 9-1-1 calls coming from within the building. Health care facilities are presumed to meet the requirements of this paragraph if the facilities are staffed with medical or nursing personnel 24 hours per day and if an alternative means of providing information about the source of an emergency call exists. Buildings under this exemption must provide 9-1-1 service that provides the building's street address.

Buildings containing workspace of more than 40,000 square feet are exempt from subsection (a) if the building maintains, at all times, alternative and adequate means of signaling and responding to emergencies, including a telephone system that provides the location of a 9-1-1 call coming from within the building, and the building is serviced by its own medical, fire and security personnel. Buildings under this exemption are subject to emergency phone system certification by the Illinois Commerce Commission.

Buildings in communities not serviced by enhanced 9-1-1 service are exempt from subsection (a).

(c) This Act does not apply to any PBX telephone extension that uses radio transmissions to convey electrical signals directly between the telephone extension and the serving PBX.

(d) An entity that violates this Section is guilty of a business offense and shall be fined not less than \$1,000 and not more than \$5,000.

(e) Nothing in this Section shall be construed to preclude the Attorney General on behalf of the Commission or on his or her own initiative, or any other interested person, from seeking relief, by mandamus, injunction, or otherwise, to compel compliance with this Section.

(f) The Commission shall promulgate rules for the administration of this Section no later than January 1, 2000.
